The steward of the Open Source Definition

The foundation for the entire Open Source software ecosystem.
We define Open Source

Simplifying software development and procurement

Our programs

**License and Legal**

An anchor for open community consensus on what constitutes Open Source. We protect the Open Source principles, enforcing the marks “Certified Open Source” and “Open Source Approved License”.

**Policy & Standards**

Monitoring policy and standards setting organizations. Supporting legislators and policy makers educating them about the Open Source ecosystem, its role in innovation and its value for an open future.

**Advocacy & Outreach**

Leading global conversations with non-profits, developers and lawyers to improve the understanding of Open Source principles and practice. OSI investigates the impacts of ongoing debates around Open Source, from artificial intelligence to security.

ClearlyDefined

We aim to crowdsource a global database of licensing metadata for every software component ever published for the benefit of all.
Open Policy Alliance

We bring non-profit organizations together to participate in educating and informing public policy decisions related to Open Source software, content, research, and education.
Deep Dive: Defining Open Source AI

We bring together global experts to establish a shared set of principles that can recreate the permissionless, pragmatic and simplified collaboration for AI practitioners.
OpenSource.net

We gave a new home to the community of contributors from opensource.com. The new platform supports healthy dialog and informed education on Open Source software topics.
